DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 8 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Specifically, line 3 of claim 8 state "triggering one of a plurality of power control mechanisms". However, it is not clear whether the triggered power control mechanism is the first power control mechanism or the second power control mechanism. Correction or clarification to the claim is therefore required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Mittal et al, Patent No. 5,719,800.

As to claim 8, Mittal et al teach monitoring an activity level of a processor to determine a power state, triggering one of a plurality of power control mechanisms, activating a first power control mechanism if the power state meets a first threshold,

Application/Control Number: 10/041,013

0440

Art Unit: 2116

monitoring a status associated with the first power control mechanism, and activating a second power control mechanism responsive to the monitored status (col. 5 lines 1-43 and col. 14 line 58 – col. 15 line 3).

As to claim 9, Mittal et al teach the status is a counter that indicates a level of power control provided by the first power control mechanism and activating the second power control mechanism responsive to the counter reaching a threshold value (col. 6 lines 13-49).

As to claim 10, Mittal et al teach the counter tracks a number of times the first power control mechanism is activated or a duration for which the first power control mechanism is activated (col. 5 lines 13-43 and col. 6 line 13 – col. 7 line 18).

As to claim 11, Mittal et al teach adjusting instruction throughput for the processor, responsive to the power state reaching the first threshold (col. 4 lines 19-37 and col. 5 lines 13-43).

As to claim 12, Mittal et al teach adjusting an operating point of the processor, responsive to the monitored status (col. 14 line 58 – col. 15 line 15).

Application/Control Number: 10/041,013

Art Unit: 2116

Claims 1-7 and 13-19 are directed to the system implementing the method of

claims 8-12. Mittal et al teach the method as set forth in claims 8-12. Therefore, Mittal

et al also teach the system as set forth in claims 1-7 and 13-19.

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Rehana Perveen whose telephone number is 571-272-

3676. The examiner can normally be reached on 8:00am - 4:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Lynne H Browne can be reached on 571-272-3670. The fax phone number

for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free).
